FEDERAL ENERGY REGULATORY COMMISSION

Marine Renewable Energy Collaborative of New  
England

Project No. 14775-000

NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING  
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND COMPETING  
APPLICATIONS

On April 20, 2016, the Marine Renewable Energy Collaborative of New England filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Cape Cod Canal and Bourne Tidal Test Site (Cape Cod Canal Test Site or project) to be located on the Cape Cod Canal, near the Town of Bourne, in Barnstable County, Massachusetts. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' permission.

The proposed project would consist of: (1) a 45-foot-high, 23-foot-wide support structure; (2) a 25-kilowatt turbine-generator unit; (3) a 500 to 7,500-foot-long, 13.2-kilovolt (kV) transmission; and (4) appurtenant facilities. The estimated average annual generation of the project would be 54.7 gigawatt-hours. The project would occupy approximately 0.5 acres of federal land under the jurisdiction of the U.S. Army Corps of Engineers.
